Medical Moment

Can LDA Therapy Help You?

LDA is the best allergy treatment because it not only treats allergies, it also treats hypersensitivities. It accomplishes these by activating your immune system to grow T-regulator cells. These cells modulate your immune system so that it does not overreact or underreact.

LDA can be used to treat all food allergies, including food based allergies, environmental and seasonal allergies, chemical hypersensitivities, histamine intolerance mast cell activation, hives, latex allergy, eczema, asthma, and more!

Dr. Mosher is our qualified LDA specialist who is able to administer LDA Therapy.

Our New Spruce Health App

We are excited to introduce our new HIPAA-compliant Spruce Health app! This app offers a more secure and safe way for you to communicate with our office. With Spruce, you can easily manage your health information, ask questions, and stay in touch with us—all while knowing that your privacy is protected.

One important note: if your family members would like to have their own login to the app, they will need to use separate email addresses. This ensures that each person's health information remains private and secure.

If you haven't received an invitation to join Spruce Health or need a new one, please don't hesitate to call or text us at 208-218-8363! We're here to help!

We look forward to staying connected with you through this new, secure platform.
